Dashboard Features

KPI Cards

The dashboard includes:

- Total Tasks
- Total Samples
- Sampling %
- Total Defects
- Defect %
- Total Fatal Errors
- Fatal Error %
- Quality Score
- Quality Score %

Key Business Insights From Dashboard

Operational Findings

- Total tasks processed reached approximately 131K.
- Sampling coverage was around 7.5%, indicating selective audit monitoring.
- Defect rate exceeded 20%, showing process improvement opportunities.
- Fatal error rate remained around 8%, highlighting critical operational risks.
- Overall quality score stayed above 81%, indicating moderate operational performance.

Employee Performance Insights

- Some employees showed high defects relative to samples, indicating inconsistent quality.
- Top-performing employees maintained higher quality scores with lower defects.

Supervisor Insights

- Quality performance varied across supervisors, suggesting differences in team management effectiveness.

Auditor Insights

- Sampling distribution differed among auditors, indicating opportunities for workload balancing.

Location-Based Insights

- Certain work locations demonstrated stronger quality scores than others.
- Regional operational practices may require standardization.

Business Impact

This dashboard helps organizations:

- Improve operational quality monitoring
- Reduce fatal operational risks
- Increase process transparency
- Enhance employee accountability
- Optimize audit strategies
- Enable data-driven management decisions
